

WIRELESS 2 & 3 WAY SWITCH KITS

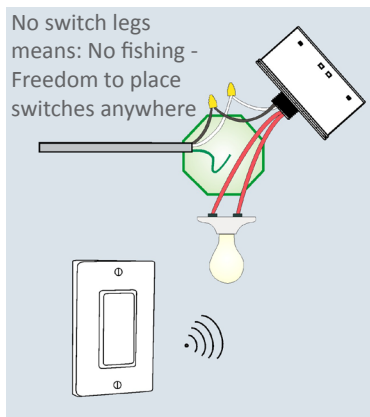

Pre-Configured Controller and Switch(es) for Wireless Lighting Control

Simply wire the controller to your lighting load, then place the pre-linked switches

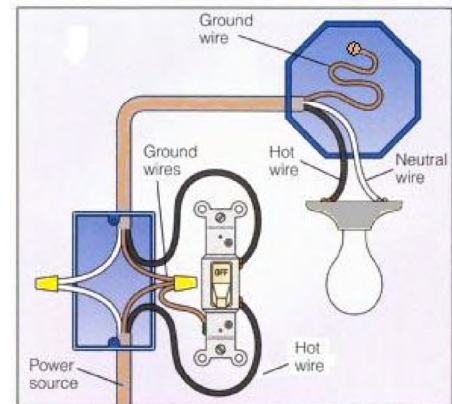

- Works out of the box - No programming - No cross talk between kits
- Switches rated to 50,000 operations - No batteries, switches are self-powered
- Transmission range of 100 m (330 ft.) line of sight; 24 m (80 ft.) for interior spaces
- Ideal for renovations - No alteration of wallboard or hard ceilings as with wired switch legs
- Added convenience of having switches where they are most accessible - No mounting hardware required
- Use anywhere that you do not want to disturb construction material with wired switch legs, ie. Heritage Buildings, Log homes or spaces with pre-existing hazardous materials.
- Use anywhere long switch legs are required: detached garages, sheds, barns, boathouses, pathways or ground lighting
